

# YOUNGRAE KIM

Address: Daejeon, South Korea

(+82) 10-8242-3322 | Email: [youngrae.kim@kaist.ac.kr](mailto:youngrae.kim@kaist.ac.kr) | Website: [website link](#)

## EDUCATION

### Korea Advanced Institute of Science and Technology (KAIST)

Daejeon, Korea

*M.S. in Computer Science*

Feb. 2022 – Feb. 2024 (expected)

- GPA: 3.66/4.3 (3.61/4.0), Advisor: Prof. Dongman Lee
- Thesis: "Few-Shot Weather-Degraded Image Restoration" (under review).
- Full-tuition Government Scholarship for Science and Engineering

### Hongik University

Seoul, Korea

*B.S. in Computer Engineering*

Mar. 2016 – Feb. 2022

- CGPA: 4.01/4.5 (3.74/4.0), Major GPA: 4.2/4.5 (3.86/4.0)
- Academic Excellence Scholarship for 7 semesters

## RESEARCH INTERESTS

Domain Adaptation, Few-shot Learning, Scene/Video Understanding

## PUBLICATIONS

Bae, K.H., **Kim, Y.R.**, Ahn G.O., et al. "DEVIAS: Learning Disentangled Video Representations of Action and Scene for Holistic Video Understanding." **CVPR 2024**. *Under review*.

**Kim, Y.R.**,\* Cho, Y.G.\*, Lee, D.M. "Beyond Entropy: Style Transfer Guided Single Image Continual Test-Time Adaptation." **CVPR 2024**. *Under review*.

**Kim, Y.R.**,\* Cho, Y.G.\*, Nguyen, T.T., Lee, D.M. "MetaWeather: Few-Shot Weather-Degraded Image Restoration via Degradation Pattern Matching." **AAAI 2024**. *Under review*. [\[Link\]](#)

**Kim, Y.R.**,\* Cho, H.H.\*, Lim, J.S.\*, Lee, M.J.\*, et al. "Efficient Reference-based Video Super-Resolution (ERVSR): Single Reference Image is All You Need." *IEEE/CVF Winter Conference on Applications of Computer Vision* **WACV 2023**. [\[Link\]](#)

(\* denotes equal contributions)

## RESEARCH EXPERIENCE

**KAIST CDSN Lab** (Advisor: Prof. Dongman Lee)

Daejeon, Korea

*Test-Time Adaptation with Style Transfer*

Aug. 2023 – Present

- Proposed flexible transfer of the input images' styles with learnable parameters.
- Changed the target domain's style to the source's to prevent overfitting and overhead of feature distribution shift.
- Wrote a paper for submission to **CVPR 2024**.

*Few-Shot Learning on Weather-Degraded Image Restoration*

Feb. 2023 – Aug. 2023

- Suggested prioritization of learning degradation patterns over background distribution by image restoration models without sufficient labeled data, assuming that degradation patterns are only the common factor among the limited few-shot images available for adaptation.
- Applied a matching network paradigm to the model to build generalized knowledge using episodic meta-learning.
- Achieved the highest performance in image restoration task; authored and submitted a paper to **AAAI 2024**.

**Kyung Hee University VLL Lab** (Prof. Jinwoo Choi's group)

Suwon, Korea

*Disentangled Video Representation Learning*

May 2023 – Present

- Examined standard video modes' limitations and clarified they often prioritize the foreground while neglecting the background in videos, which leads to information loss.
- Wrote a paper for submission to **CVPR 2024**.

**KAIST CS507 AI & ML Course** (Advisor: Prof. Tae-kyun Kim)

**Daejeon, Korea**

***Efficient Video Super-Resolution***

Apr. 2022 – Aug. 2022

- Identified the issue of low computational efficiency in existing reference-based video super-resolution task.
- Determined the suitability/sufficiency of a single frame as a reference feature instead of all frames.
- Extracted the full features of one reference frame and transferred the feature to all frames.
- Greatly improved computational efficiency with minimal performance impact; published results on **WACV 2023**.

**Hongik University APL Lab** (Advisor: Prof. Young Yoon)

**Seoul, Korea**

***Taxi Dispatch System for Maximizing Profits***

Jul. 2020 – Dec. 2021

- Processed raw sensor data; implemented and conducted experiments using realistic simulations to evaluate the effectiveness of various dispatching strategies.

## **ACADEMIC SERVICE**

---

Reviewer, IEEE/CVF Computer Vision and Pattern Recognition Conference (CVPR 2024)

Reviewer, IEEE Transactions on Circuits and Systems for Video Technology (TCSVT)

## **TEACHING ASSISTANTSHIPS**

---

**Korea Advanced Institute of Science and Technology (KAIST)**

**Daejeon, Korea**

"CS206 Data Structure", School of Computing – *Best TA Award*

Fall 2022

"CS330 Operating System", School of Computing

Spring 2022

## **PROFICIENCY IN SKILLS**

---

**Programming:** Python, C/C++, JAVA, Verilog

**Frameworks:** PyTorch, Docker, Triton Inference Server, gRPC

## **MILITARY EXPERIENCE**

---

*Honorable Discharge as a Sergeant*, Republic of Korea Air Force, **Cheongju, Korea**

Apr. 2018 – Mar. 2020
