

# YOUNGRAE KIM

Address: Daejeon, South Korea

(+82) 10-8242-3322 | Email: [youngrae.kim@kaist.ac.kr](mailto:youngrae.kim@kaist.ac.kr) | Website: [website link](#)

## EDUCATION

### Korea Advanced Institute of Science and Technology (KAIST)

Daejeon, Korea

*M.S. in Computer Science*

Feb. 2022 – Feb. 2024 (expected)

- GPA: 3.66/4.3 (3.62/4.0), Advisor: Prof. Dongman Lee
- Thesis: “Few-Shot Weather-Degraded Image Restoration” (under review).
- Full-tuition Government Scholarship for Science and Engineering

### Hongik University

Seoul, Korea

*B.S. in Computer Engineering*

Mar. 2016 – Feb. 2022

- CGPA: 4.01/4.5 (3.74/4.0), Major GPA: 4.2/4.5 (3.86/4.0)
- Academic Excellence Scholarship for 7 semesters

## RESEARCH INTERESTS

Domain Adaptation, Few-shot Learning, Image/Video Understanding

## PUBLICATIONS

## RESEARCH EXPERIENCE

**KAIST CDSN Lab** (Advisor: Prof. Dongman Lee)

Daejeon, Korea

***Test-Time Adaptation with Style Transfer***

Aug. 2023 – Nov. 2023

- Addressed instability of test-time adaptation methods, especially when using small batch sizes.
- Stabilized the adaptation process even with a single image, interpolating the statistics of the target domain.
- Formulated the test-time adaptation problem as a style transfer problem with novel losses.
- Attained the best performances in both semantic segmentation and image classification; authored and submitted a paper to **CVPR 2024**.

***Few-Shot Learning on Weather-Degraded Image Restoration***

Feb. 2023 – Aug. 2023

- Suggested prioritization of learning degradation patterns over background distribution by image restoration models without sufficient labeled data, assuming that degradation patterns are only the common factor among the limited few-shot images available for adaptation.
- Applied a matching network paradigm to the model to build generalized knowledge using episodic meta-learning.
- Achieved the highest performance in image restoration task; authored and submitted a paper to **AAAI 2024**.

**Kyung Hee University VLL Lab** (Prof. Jinwoo Choi's group)

**Suwon, Korea**

***Disentangled Video Representation Learning.***

May 2023 – Nov. 2023

- Examined standard video modes' limitations and clarified they often prioritize the foreground while neglecting the background in videos, which leads to information loss.
- Proposed a novel auxiliary task that significantly improves performance.
- Showed the disentangled and effective representations in our experiments; authored and submitted a paper to **CVPR 2024**.

**KAIST CS570 AI & ML Course** (Advisor: Prof. Tae-kyun Kim)

**Daejeon, Korea**

***Efficient Video Super-Resolution***

Apr. 2022 – Aug. 2022

- Identified the issue of low computational efficiency in existing reference-based video super-resolution task.
- Determined the suitability/sufficiency of a single frame as a reference feature instead of all frames.
- Extracted the full features of one reference frame and transferred the feature to all frames.
- Greatly improved computational efficiency with minimal performance impact; published results on **WACV 2023**.

**Hongik University APL Lab** (Advisor: Prof. Young Yoon)

**Seoul, Korea**

***Taxi Dispatch System for Maximizing Profits***

Jul. 2020 – Dec. 2021

- Processed raw sensor data; implemented and conducted experiments using realistic simulations to evaluate the effectiveness of various dispatching strategies.

**ACADEMIC SERVICE**

Reviewer, IEEE Transactions on Circuits and Systems for Video Technology (TCSVT)

---

**TEACHING ASSISTANTSHIPS**

**Korea Advanced Institute of Science and Technology (KAIST)**

**Daejeon, Korea**

"CS206 Data Structure", School of Computing – *Best TA Award*

Fall 2022

"CS330 Operating System", School of Computing

Spring 2022

---

**PROFICIENCY IN SKILLS**

**Programming:** Python, C/C++, JAVA, Verilog

**Frameworks:** PyTorch, Docker, Triton Inference Server, gRPC

---

**MILITARY EXPERIENCE**

*Honorable Discharge as a Sergeant*, Republic of Korea Air Force, **Cheongju, Korea**

Apr. 2018 – Mar. 2020

---
