

YOUNGRAE KIM

Address: Seoul, South Korea | Email: youngrae@usc.edu | Website: [website link](#)

EDUCATION

University of Southern California (USC)

Los Angeles, CA, USA

Ph.D. in Computer Engineering

From Aug. 2024

- Advisor: Prof. C.-C. Jay Kuo

Korea Advanced Institute of Science and Technology (KAIST)

Daejeon, Korea

M.S. in Computer Science

Feb. 2022 – Feb. 2024

- GPA: 3.66/4.3 (3.62/4.0), Advisor: Prof. Dongman Lee
- Thesis: "Few-Shot Weather-Degraded Image Restoration"
- Full-tuition Government Scholarship for Science and Engineering

Hongik University

Seoul, Korea

B.S. in Computer Engineering

Mar. 2016 – Feb. 2022

- CGPA: 4.01/4.5 (3.74/4.0), Major GPA: 4.2/4.5 (3.86/4.0)
- Academic Excellence Scholarship for 7 semesters

RESEARCH INTERESTS

Domain Adaptation, Few-shot Learning, Image/Video Understanding

RESEARCH EXPERIENCE

KAIST CDSN Lab (Advisor: Prof. Dongman Lee)

Daejeon, Korea

Test-Time Adaptation

Aug. 2023 – Jul. 2024

- Formulated the test-time adaptation problem as a style transfer problem with novel losses.
- Stabilized the adaptation process even with a single image, interpolating the statistics of the target domain.

Few-Shot Learning on Weather-Degraded Image Restoration

Feb. 2023 – Mar. 2024

- Firstly proposed the need for few-shot learning in the area of weather-degraded image restoration.
- Suggested prioritization of learning degradation patterns over background distribution by image restoration models without sufficient labeled data, assuming that degradation patterns are only the common factor among the limited few-shot images available for adaptation.
- Demonstrated that our performance is comparable to that of many samples; published results on **ECCV 2024**.

Kyung Hee University VLL Lab (Prof. Jinwoo Choi's group)

Suwon, Korea

Disentangled Video Representation Learning

May 2023 – Nov. 2023

- Examined standard video modes' limitations and clarified they often prioritize the foreground while neglecting the background in videos, which leads to information loss.
- Proposed a novel auxiliary task that significantly improves performance.
- Showed the disentangled and effective representations in our experiments; published results on **ECCV 2024**.

KAIST CS570 AI & ML Course (Advisor: Prof. Tae-kyun Kim)

Daejeon, Korea

Efficient Video Super-Resolution

Apr. 2022 – Aug. 2022

- Identified the issue of low computational efficiency in existing reference-based video super-resolution task.
- Determined the suitability/sufficiency of a single frame as a reference feature instead of all frames.
- Extracted the full features of one reference frame and transferred the feature to all frames.
- Greatly improved computational efficiency with minimal performance impact; published results on **WACV 2023**.

Hongik University APL Lab (Advisor: Prof. Young Yoon)

Seoul, Korea

Taxi Dispatch System for Maximizing Profits

Jul. 2020 – Dec. 2021

- Processed raw sensor data; implemented and conducted experiments using realistic simulations to evaluate the effectiveness of various dispatching strategies.

ACADEMIC SERVICE

Reviewer, IEEE/CVF Conference on Computer Vision and Pattern Recognition (**CVPR**)

Reviewer, IEEE Transactions on Circuits and Systems for Video Technology (**TCSVT**)

TEACHING ASSISTANTSHIPS

Korea Advanced Institute of Science and Technology (KAIST)

Daejeon, Korea

"CS206 Data Structure", School of Computing – *Best TA Award*

Fall 2022

"CS330 Operating System", School of Computing

Spring 2022

PROFICIENCY IN SKILLS

Programming: Python, C/C++, JAVA, Verilog

Frameworks: PyTorch, Docker, Triton Inference Server, gRPC

MILITARY EXPERIENCE

Honorable Discharge as a Sergeant, Republic of Korea Air Force, **Cheongju, Korea**

Apr. 2018 – Mar. 2020
