

YOUNGRAE KIM

Address: Daejeon, South Korea

(+82) 10-8242-3322 | Email: youngrae.kim@kaist.ac.kr | Website: [website link](#)

EDUCATION

Korea Advanced Institute of Science and Technology (KAIST)

Daejeon, Korea

M.S. in Computer Science

Feb. 2022 – Feb. 2024 (expected)

- GPA: 3.66/4.3 (3.61/4.0), Advisor: Prof. Dongman Lee
- Thesis: "Few-Shot Weather-Degraded Image Restoration" (under review).
- Full-tuition Government Scholarship for Science and Engineering

Hongik University

Seoul, Korea

B.S. in Computer Engineering

Mar. 2016 – Feb. 2022

- CGPA: 4.01/4.5 (3.74/4.0), Major GPA: 4.2/4.5 (3.86/4.0)
- Academic Excellence Scholarship for 7 semesters

RESEARCH INTERESTS

Domain Adaptation, Few-shot Learning, Scene/Video Understanding

PUBLICATIONS

Bae, K.H., **Kim, Y.R.**, Ahn G.O., et al. "DEVIAS: Learning Disentangled Video Representations of Action and Scene for Holistic Video Understanding." **CVPR 2024**. *Under review*.

RESEARCH EXPERIENCE

KAIST CDSN Lab (Advisor: Prof. Dongman Lee)

Daejeon, Korea

Test-Time Adaptation with Style Transfer

Aug. 2023 – Nov. 2023

- Proposed flexible transfer of the input images' styles with learnable parameters.
- Changed the target domain's style to the source's to prevent overfitting and overhead of feature distribution shift.
- Wrote a paper for submission to **CVPR 2024**.

Few-Shot Learning on Weather-Degraded Image Restoration

Feb. 2023 – Aug. 2023

- Suggested prioritization of learning degradation patterns over background distribution by image restoration models without sufficient labeled data, assuming that degradation patterns are only the common factor among the limited few-shot images available for adaptation.
- Applied a matching network paradigm to the model to build generalized knowledge using episodic meta-learning.
- Achieved the highest performance in image restoration task; authored and submitted a paper to **AAAI 2024**.

Kyung Hee University VLL Lab (Prof. Jinwoo Choi's group)

Suwon, Korea

Disentangled Video Representation Learning

May 2023 – Nov. 2023

- Examined standard video modes' limitations and clarified they often prioritize the foreground while neglecting the background in videos, which leads to information loss.
- Wrote a paper for submission to **CVPR 2024**.

KAIST CS507 AI & ML Course (Advisor: Prof. Tae-kyun Kim)

Daejeon, Korea

Efficient Video Super-Resolution

Apr. 2022 – Aug. 2022

- Identified the issue of low computational efficiency in existing reference-based video super-resolution task.
- Determined the suitability/sufficiency of a single frame as a reference feature instead of all frames.
- Extracted the full features of one reference frame and transferred the feature to all frames.
- Greatly improved computational efficiency with minimal performance impact; published results on **WACV 2023**.

Hongik University APL Lab (Advisor: Prof. Young Yoon)

Seoul, Korea

Taxi Dispatch System for Maximizing Profits

Jul. 2020 – Dec. 2021

- Processed raw sensor data; implemented and conducted experiments using realistic simulations to evaluate the effectiveness of various dispatching strategies.

ACADEMIC SERVICE

Reviewer, IEEE/CVF Computer Vision and Pattern Recognition Conference (CVPR 2024)

Reviewer, IEEE Transactions on Circuits and Systems for Video Technology (TCSVT)

TEACHING ASSISTANTSHIPS

Korea Advanced Institute of Science and Technology (KAIST)

Daejeon, Korea

"CS206 Data Structure", School of Computing – *Best TA Award*

Fall 2022

"CS330 Operating System", School of Computing

Spring 2022

PROFICIENCY IN SKILLS

Programming: Python, C/C++, JAVA, Verilog

Frameworks: PyTorch, Docker, Triton Inference Server, gRPC

MILITARY EXPERIENCE

Honorable Discharge as a Sergeant, Republic of Korea Air Force, **Cheongju, Korea**

Apr. 2018 – Mar. 2020
